

OX INDUSTRIES

Cutting Edge Technology. Innovative Solutions.

Ox Industries is a leading manufacturer of 100% uncoated recycled paperboard (URB) and custom converted paper products in the United States. Ox currently has four paper mills strategically located across the US. Each of our converting facilities uses paperboard exclusively from our mills for converting products. The mill sites are the beginning of our vertically integrated operations which result in improved efficiency and quality to each of our customers.

Our URB can be used for protective packaging, separator sheets, gift boxes, paper tubes & cores, specialty paper and more.
